Parcel Delivery Lockers

alfaBOX

Modular parcel delivery lockers for any location

„Discover more“

Prime

Performance you can count on

Our most powerful station, built for high-traffic locations. Prime delivers 24/7 reliability, a full set of features, and maximum capacity to ensure fast and seamless parcel handling, day after day.

Flex

Independent delivery with full control

Engineered for off-grid locations, Flex provides solar-powered and energy-efficient operation. Its high capacity guarantees a smooth delivery experience in remote or infrastructure-limited areas.

Lite

Smart simplicity with minimal costs

A practical, energy-saving station with all the essential features. Lite is the perfect choice for smaller towns and lower parcel volumes, where simplicity and reliability are what matter most.

Parameter	Prime	Flex	Lite
Power Supply – Electrical Grid	Yes	Optional	Optional
Power Supply – Battery + Solar Panel	No	Yes	Yes
Touchscreen Display	Yes	Yes	No
Information display / Keyboard	No	No	Yes
Payment Terminal	Optional	Optional	No
Barcode Scanner	Optional	Optional	Optional
CCTV Security System	Optional	Optional	No
External LED Lighting	Optional	Optional	No
Internal Locker Lighting	Optional	No	No

alfaBOX Prime

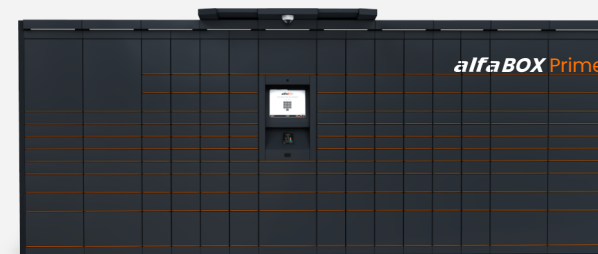

Delivery without compromise

„Discover more“

Key Features

- Reliable 24/7 operation with a stable power supply
- Intuitive touchscreen interface for effortless user experience
- Optional add-ons: payment terminal and barcode scanner
- Enhanced security with advanced camera system and LED lighting
- Durable modular design with expandable capacity

Why Choose Prime?

Prime is built for high-volume locations with heavy user traffic. With its robust power supply and wide range of advanced features, it delivers unmatched speed, convenience, and reliability. Perfect for urban hubs, logistics centers, and large retail complexes, where performance truly matters.

Designed as a fully professional solution, Prime offers high capacity and long-term dependability. With remote management and real-time monitoring, it simplifies operations and service interventions. Prime is more than just a station — it's an investment in the future of parcel delivery, ready to expand and adapt to the growing needs of your location.

alfaBOX Flex

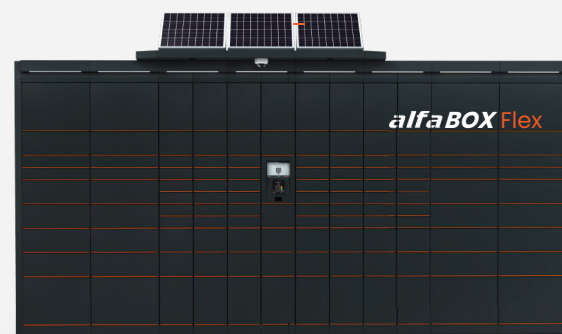

Independent delivery with full control

„Discover more“

Key Features

- Autonomous Operation with Solar Charging
- Intuitive Touchscreen Display
- Optional Payment Terminal and Lighting
- Energy-Saving Power Management Mode
- Modular Design with Scalable Capacity
- Optional Camera System and Barcode Scanner

Why Choose Flex?

Flex is an ideal solution for areas where stable electrical power is unavailable. Equipped with a solar system and smart energy management, it operates reliably even in remote locations or during temporary testing of new delivery points.

Flex provides full functionality without relying on the grid and maintains minimal operating costs. This variant offers a wide range of features that enable flexible development of the delivery network without the need for complex infrastructure. It is designed to withstand challenging climatic conditions while remaining energy-efficient.

alfaBOX Lite

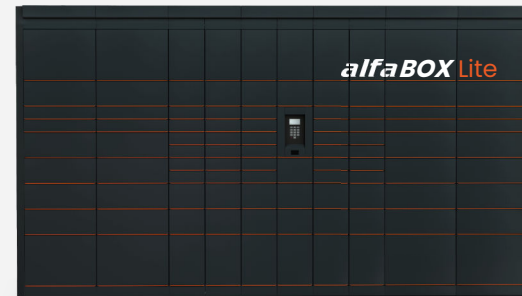

Simple solution with minimal costs

„Discover more“

Key Features

- Integrated Solar Panel with Battery Power
- Easy Operation Through Keypad and Display
- Reliable Technology Used by Logistics Firms
- Low Energy Consumption and Minimal Maintenance Needed
- Sturdy and Stable Construction for Outdoor Use

Why Choose Lite?

Lite is a cost-effective solution for smaller municipalities and locations that handle lower parcel volumes. It provides reliable operation without complex features and comes with low operating costs. This variant is ideal for situations where a simple, easily deployable, and durable station is needed for convenient parcel delivery.

Designed for maximum efficiency and long service life, Lite boasts a robust construction and energy-saving components that ensure smooth operation even in challenging outdoor conditions. It is especially suitable for areas with lower shipment density, where simplicity, quick installation, and minimal operating costs are the main priorities.

About ALFA 3

Founded in 1991, ALFA 3 has become one of the leading manufacturers of metal furniture and self-service delivery lockers in the Czech Republic. We specialize in the development and production of innovative locker solutions for logistics and parcel delivery, which are now essential components of the smart infrastructure in cities and communities.

With decades of experience and a forward-thinking approach, we offer products that showcase quality, functionality, and modern design. Our lockers are designed to simplify and streamline the delivery process, enhance user convenience, and provide cost efficiency for operators.

Technology & Production

Production at ALFA 3 utilizes modern technologies and process automation. Our robotic and CNC lines ensure maximum precision and efficiency in sheet metal processing, enabling us to manufacture products of the highest quality with a strong focus on detail. Painting is performed using a semi-automatic IDEAL LINE with GEMA Magic Cylinder application.

Our production and design processes are fully integrated with Industry 4.0 standards, providing us with complete oversight of every stage of production and the flexibility to adapt to the unique requirements of each customer. The result is a powerful combination of advanced technology, high productivity, and unmatched reliability that our partners can always trust.
